

Aurora Analytics

2026 Annual Review

Growth with discipline: revenue, customers, and what's next

Document No. AA-2026-AR · Prepared by Strategy Office · 18 Sep 2026

1 Highlights

2026 was the year Aurora Analytics turned scale into operating leverage. Full-year revenue reached \$8.96M, up 12.4% year over year, while net revenue retention climbed to 118%. The North region passed \$3M for the first time and became the main growth driver; the East stayed solid and the South is under a structured recovery plan. Headcount grew 22% with attrition at a five-year low of 6.1%.

- **Revenue \$8.96M (+12.4% YoY)** — new-product attach rate hit 78%, 6 points above plan.
- **1,240 enterprise customers** — including 36 Fortune-500 logos won this year.
- **NRR 118%** — expansion outpaced churn for the sixth consecutive quarter.
- **Cash runway 28 months** — burn multiple improved from 2.1x to 1.4x.

2 Financials by region

Regional performance (\$10K)

Region	Q2	Q3	QoQ	Share
East	348.0	391.0	+12.4%	43.6%
South	221.0	205.0	-7.2%	22.9%
North	246.0	300.0	+22.0%	33.5%
Total	815.0	896.0	+9.9%	100%

Figure 1 — Q3 regional mix. North is now one-third of the business.

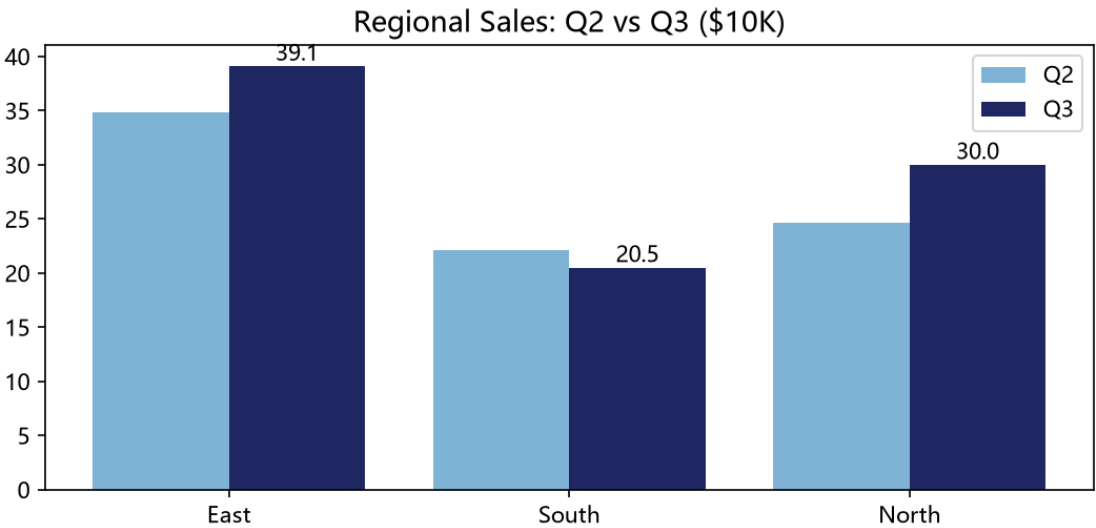

Figure 2 — Regional sales, Q2 vs Q3 (\$10K).

What drove the South decline?

Two enterprise renewals slipped into October (\$160K combined) and one distributor churned after an acquisition. Excluding timing effects, South grew 3.1%. A dedicated recovery squad now owns the top-20 Southern accounts with weekly pipeline reviews.

3 Customers & product

Net new ARR of \$1.9M came 60% from expansion. The new Metric Studio (launched May) already contributes 14% of new bookings, with trial-to-paid conversion at 31% — double the company average.

Product line	New ARR (\$K)	Conv.	NPS
Core Dashboards	820	18%	52
Metric Studio	610	31%	61
Data Pipelines	340	22%	48
Professional Svcs	130	—	57

Table 1 — 2026 new ARR by product line.

4 2027 priorities

Three bets, in order:

- 1 **Hold the North's lead** — add a second solutions team in Chicago before March.
- 2 **Bring the South back** — recover to +10% growth by Q2 with the top-20 account plan.
- 3 **Finish the platform rollout** — SSO/SIEM pack and EU data residency in H1.
